

RIVNUT® Flat Head Hex Body (inch)

The RIVNUT® – Flat Head Hex Body is provided in both a standard and heavy hex design. The heavy hex design features a larger body diameter that results in increased thread strength and torque capability. The hex body design provides the ultimate in spin-out resistance when used in a hex hole. The RIVNUT® is designed for use with Property class 5 mating hardware. A grip ID mark is included on the head of the fastener for grip range identification.

Class 3B threads
Steel: C1010
