

SNAPLOC® Decoupling plug-in connections

Fields of application in general industry

SNAPLOC® is implemented in different fields of application, e.g.:

Plant engineering

- Extraction channel at calender plant

Store construction

- Bar lighting

Filter technique

- Fastening filter frame

Medical technology

- Dialysis machine

Consumer electronics

- Decoration strip fastening for television sets
- Speaker fastening

Mechanical engineering

- Diesel particulate filter cover

Crane engineering

- Cabin coverings

Fork lift trucks

- Electronic assembly

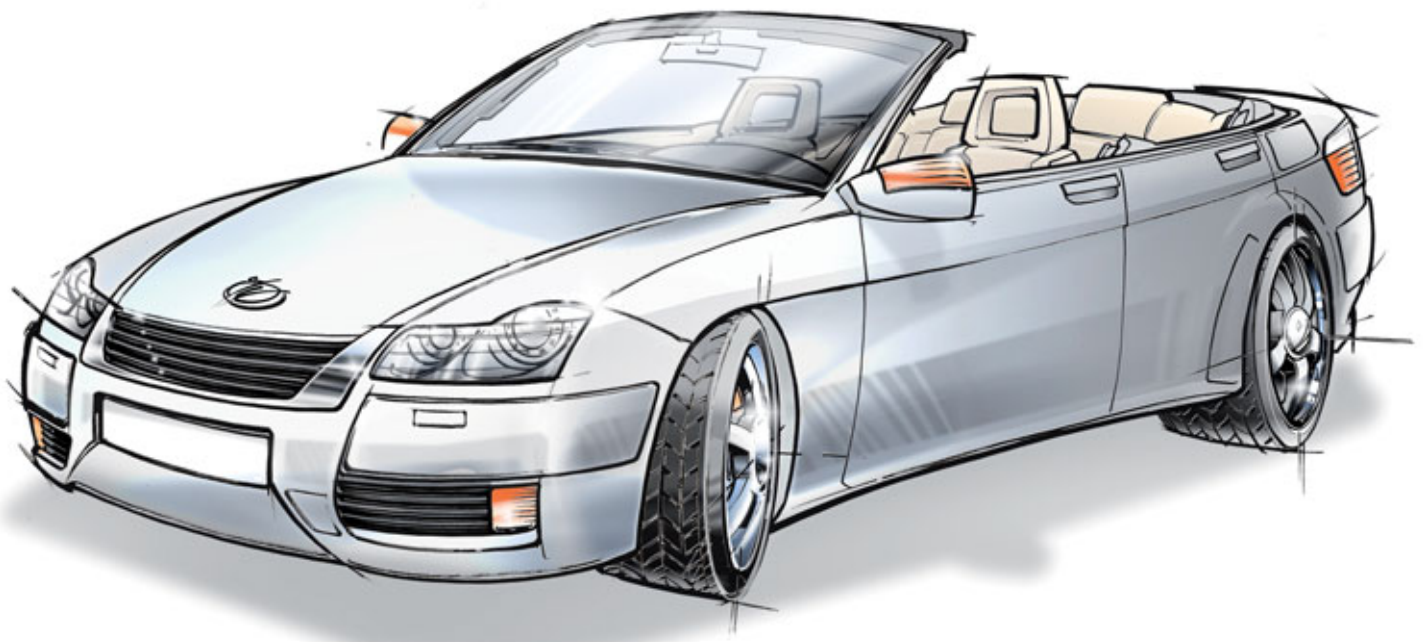

Possible and implemented main fields of application in automotive industry

Engine and aggregates

- NVH design hoods
- Engine cover
- Air filter fastening to suction pipe
- Fastening valve cover
- Fastening induction manifold
- Fastening engine control unit

Body (exterior)

- Trim panel bumper
- Fastening rear light

Interior

- Cockpit – instrument panel
- Seats – locker
- Cover/acoustics
- Rear shelf
- Fastening shelf to roof liner
- Climate control panel
- Loudspeaker

Body structure

- Rear end pre-fixation tool tray
- Fastening valve to strut
- A-pillar fastening
- Underbody fastening
